Describe your data in UQ eSpace

“data that underpin a journal article should be made concurrently available in an accessible database”

Why?

• Create a discoverable and durable record of your dataset
• Safely store data underpinning your publications
• Mint a DOI and facilitate citation of the dataset
• Link data to your publications in UQ eSpace
• Ensure reproducibility of research outcomes
• Comply with journal policies* 
• Protect your datasets with UQ Terms & Conditions

*Nature;  PLoS;  
Journal of the Royal Society;  
PNAS;  etc.

How?

• Login to UQ eSpace and select Add Missing Data Collection
• Describe your data in the required fields; upload data if required
• Before the record is made public, a librarian will review and enrich it
• If you don’t already have one, you will be asked to register for an ORCID® identifier

Need some extra help?

Email data@library.uq.edu.au with information about your dataset and a librarian will assist you
